

QUANTAR MAGIC!

‘Monetising our communities,
the shared heart of our nations!’

Quantar Australia, or simply TheQ, presents a digital currency, accessed by computers, tablets, and mobile phones, through the Quantar Ap. Each Quantar member, must be at least eight years of age, with an individual, Australian bank account, so we ensure the integrity of TheQ marketplace. The \$AUD16 annual membership, creates a Quantar account, with 500Q, in seed capital. When trading, every Quantar, equals one Australian dollar, so this annual fee, increases in value, by 3125%, and with each annual, membership renewal, TheQ subscribers, receive an additional 500Q.

TheQ members, can now monetise the historical ‘commons’, with transactions, between friends, families, students, pensioners, the unemployed, trade union members, businesses, and the general Australian population. Quantar members, may also ‘gift’ Quantars, to those in need.

In Quantar, there are no fees, upon market trades, and TheQ’s only income, derives from subscriptions, merchandising, and donations. Further, Quantars cannot be exchanged, with national currencies, there is no capital gains potential, no investment strategy, and Quantar is never, a ‘casino’ of greed. Quantar is simply, an ‘Aristotelian’ marketplace, designed, for authentic trades.

Australian businesses, trading with Quantars, fulfil their GST obligations, by recording their trades, as Australian dollar transactions, with their GST payments, transferred to the ATO. We also ask Quantar members, with each membership renewal, to introduce five new Quantar subscribers. TheQ membership, will then rapidly expand, allowing Quantar to eventually trade, upon other markets, such as Ebay, and Amazon, with these marketplaces, also offering their own products, and services, in alternative Quantar prices.

All these Quantar concepts, support a \$AUD10,000 Universe Challenge, based upon a binary decision, where we must choose, between a matter-based universe, 'Rocks from Nothing', or a consciousness-based universe, 'Quantum Images, upon an Eternal Mirror'? We may discover, when we consider this Challenge, our 'choice' of universe, also predicts the monetary systems, we will decree, for our world. Welcome to Quantar, TheQ! Market, and trading freedom!
